This a~~ drying cabinet 1 comprises a housing cube 2 which is open on one side and which can be closed on the open side by a door 3. This interior~~ 4 is subdivided by heating plates 5 which are designed as shelves upon which product trays 6 can be placed. These product trays 6 are removable. Therefore, they can be cleaned outside of the drying cabinet 1 in a particularly efficient manner. Only one of the product trays 6, that on the topmost heating plate 5, is shown. All product trays 6 are removed from the drying cabinet 1 when cleaning work is performed on the drying cabinet 1; for this reason, the one product tray 6 is indicated in dashed lines to show its position.
